

This is to certify that
Tsung-Ta Yu
has successfully completed the course

Statistical Methods for Life Sciences

Held in Uppsala, 7-11 September 2026

The course consisted of lectures, exercises and group discussions. The following subjects were covered and graded in the lectures and exercises:

- Probability and distributions
- Statistical inference
- Linear models
- Generalized linear models
- Mixed-effects models
- Survival analysis
- Principal Component Analysis
- Clustering
- Introduction to machine learning

The course was arranged by the National Bioinformatics Infrastructure Sweden (NBIS) at Science for Life Laboratory (SciLifeLab).
